

Engineer Friendly City
Fukuoka

The Engineer Cafe, a part of the "**Engineer Friendly City Fukuoka**" initiative, was established in August 2019 through collaboration between Fukuoka City and its residents. It serves as a support facility for engineers, and aspiring engineers.

With a daily **community manager**, we offer assistance for any technical concerns or questions.

Additionally, our team includes active engineers known as "**Hacker Supporters**" who can provide expertise in specialized areas.

Feel free to reach out for any technical assistance.

We operate the main hall and underground facilities with the concept of an 'Event Space for Engineers.' During times when there are no events, we provide these areas as co-working spaces for free. The available co-working spaces include:

- Main Hall
- Under Space
- Concentration Space

The Concentration Space (shown on the right) is a quiet area divided into six small rooms.

Please note that this space is designated as 'quiet area' and no talking, phone calls, or web meetings are allowed.

If you wish to change your seat during your visit, please be sure to inform the reception desk.

Additionally, we offer a 'Meeting Space' for small group discussions and a 'Maker's Space' designed for engineering-related projects. For more information, please inquire with our staff.

Seats are generally available for use in two-hour time slots.

(Soundproof rooms are available in one-hour time slots.)

If no one is waiting, you may extend your time as many times as you'd like.

If you'd like to extend, please let us know as early as possible.

To request an extension, please either speak directly to a staff member or make a request via the reception channel of the **Online Engineer Cafe** on Discord.

The **Online Engineer Cafe** is a space designed to foster interaction among people involved in various areas of engineering!

We encourage you to join!

We'll explain more about how to join Discord later on.

Note: The soundproof room refers to a small, single-person space.

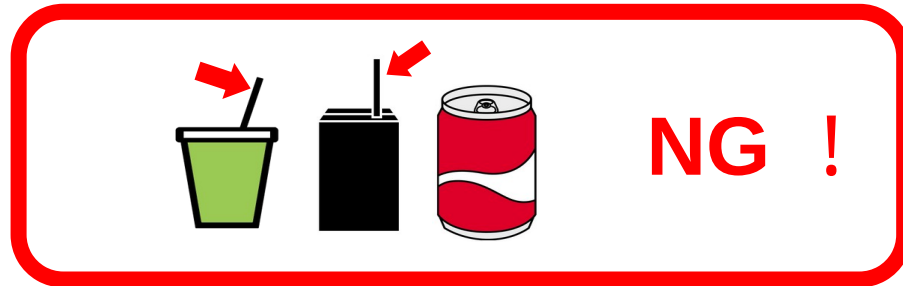

Finally, please note that Fukuoka City Red Brick Cultural Center is a nationally registered Important Cultural Property.

As such, food and beverages are generally not allowed inside the building.

There is an exception for beverages with sealed lids; those may be brought in.

However, even if they have sealed lids, the use of straws is not allowed, so please be mindful of this rule.

For more details, please check with our staff.

About New Registration

Welcome to Engineer Cafe!

At Engineer Cafe, we kindly ask all visitors to register as members.
Please scan the QR code below to access the membership registration form.

①

First, please connect to Wi-Fi.
